

New, Used and Refurbished Drone Light Show System Catalog

Public B2B buyer catalog for RFQ conversations. Final quotation depends on exact batch, battery condition, freight route, destination country and compliance review.

Main Packages

Package	Best for	Public scope
50 drones	Training teams, resorts, first demos	Inspected aircraft, screened batteries, basic chargers, starter spares and simple proof pack
100 drones	City festivals, hotels, brand launches	Aircraft batch, battery set, charger racks, flight cases, software notes and test proof
200 drones	Event operators expanding fleet size	Batch-matched aircraft, charging workflow, ground control, cases, spares and handover checklist
500+ drones	Regional operators and large public events	Batch planning, redundant control scope, bulk batteries, export packing and compliance review

What A Complete System Can Include

- Show drones / aircraft: exact model, year, quantity, serial range, LED status, RTK status and firmware notes.
- Flight batteries: model, quantity, visible condition, cycle range and UN38.3 / transport document status.
- Chargers and power: charger model, channel count, racks, cables, plug standard and spare charger availability.
- Ground control: workstation or controller, RTK/base station, data radio, router, tripod and connection cables.
- Software and files: show-control software path, account/license handover, route files, calibration data and operator notes.
- Packing: flight cases, battery boxes, inner foam, cartons, pallets and final packing photos.
- Spares: propellers, propeller guards, motors, arms, LED boards, screws, cables and tools.
- Training and support: preflight checklist, battery rotation, ground-array setup, emergency workflow and optional remote start-up support.

Inspection Proof Pack

- Batch photos and aircraft close-ups.
- Case video or test-flight video.
- Battery-cycle range and excluded-battery disclosure.
- Charger, case, spare-parts and packing-list photos.
- Visible-condition notes for aircraft, LEDs, motors, arms, propellers and electronics.
- Destination, importer path, civil end-use statement and freight notes.

Aircraft Model Photo Archive

- Phoenix Xiaoniu Show Drone: assembled aircraft and part photos.
- Phoenix 320 series candidate batch: aircraft overview photos, exact batch to confirm by RFQ.
- Phoenix 450 series candidate batch: aircraft top and angle photos, exact battery/control package to confirm.
- Guarded S-series candidate aircraft: propeller-guard aircraft photos for buyer matching.
- Round aircraft teardown candidate: disassembly photo for maintenance and spare-parts review.

Buyer RFQ Checklist

- Destination country and buyer company.
- Target quantity: 50 / 100 / 200 / 500+ drones.
- Target show date or delivery date.
- Civil end use and event type.
- Importer or local flight-permit path, if known.
- Budget range.
- Required accessories: extra batteries, chargers, cases, spares, software handover and training.

Export, Battery And Compliance Notes

Used drone show systems are reviewed case by case. The site does not promise unrestricted export, local flight permission, class marking, Remote ID compliance or immediate stock availability.

Lithium batteries require condition screening, UN38.3 / test-summary availability, dangerous-goods packing and freight-forwarder confirmation. Damaged, swollen or scrap batteries are excluded from air freight.

EU, UK and US inquiries require manual review. Military, weapon, border, policing, surveillance or unclear end-use inquiries are not quoted automatically.
